SUMMARY	A Product Designer pursuing the path of Design Engineer through usage of modern AI workflows and learning through experimentation. I spend most of my time ideating, designing, and prototyping personal design tools aimed at improving my personal workflows in the rapidly advancing AI landscape. I am highly skilled with AI IDE tools, CLI agents, and AI-driven design tooling. Skilled at delivering functional prototypes in a rapid manner. Proficient and expert level understanding and usage of Figma with the ability to prototype, design, create variants, components and other reusable primitives for design systems.		
EXPERIENCE	Freelance Product & Web Designer Jan 2023 - Present Remote	SALT MacOS Design Library Swift	Designed and built a functional Raycast-like design library tool for quickly gathering project moodboarding inspiration. Implemented using Swift UI, Claude Code & Gemini. Stores imagery, color palettes, links, notes and allows for organization by project.
		ALCHEMIST AI response-analysis Next.js	Built and integrated Deepseek's V3.2 Thinking agent into a tool that allows the user to analyze discrepancies and agreements across multi-agent responses. Deepseek's tool connected via API thinks on the inputs and provides a best-path forward answer based on its analysis.
		WIRED Chrome Extension	Created a Google Chrome Extension for dissecting production grade websites and deconstructing them into copy/pastable Figma recipes. Allows me to go to any website and choose components or website blocks, then rebuild them in code or in Figma.
		Client Work	Designed and shipped responsive website for two client portfolio's. Used Figma to React workflow for bseku.com, a master student. As well as delivered a custom design for a real estate agent using Framer.
SKILLS	Design Tooling Technical Familiarity AI-Dev & Prototyping Product & UX	Figma, Framer, Figjam, Affinity 3, Webflow React, Next.js, HTML, CSS, Tailwind CSS, Responsive Design, Performance Optimizing Cursor, Windsurf, VO, Bolt, Lovable, Figma Make, Claude Code, Context Engineering research, wireframing, prototyping, accessibility, design systems	
EDUCATION	Toronto Metropolitan University Advanced Figma Certification UX Design Certification	Bachelor of Commerce Course Completion - hosted by Design Lab Course Completion - hosted by Google & Coursera
